TSX Venture Exchange: MDX

MedX Health Corp. announces launch of skin scanning service in the Netherlands

MISSISSAUGA, ON, November 29, 2017 – MedX Health Corp. (“MedX”) (TSX-V: MDX) is pleased to announce that its channel partner, Nationale Healthcheck (“NH”), has launched its skin assessment service using SIAscopy in the Netherlands.

NH has commenced the installation of its proprietary diagnosis and triage system addressing selected illnesses including cardiac disease, diabetes, skin cancer and Post Traumatic Stress Disorder (“PTSD”). NH has selected MedX’s SIAscopy technology for its skin assessment module with remote diagnosis. The service is reimbursed through the Dutch health insurance system. NH has expressions of interest from more than 250 health service companies with more than 70 firm orders, and is planning to supply this service across the entire country. MedX has begun making deliveries as NH rolls out their program over the coming months.

“There were almost 16,000 skin cancer cases in Holland last year, a 7.5% increase over the previous year, as reported by the NL Times, so checking moles and lesions is an essential part of our product offering,” stated Paul Vlaanderen, CEO of Nationale Healthcheck. “We selected MedX’s technology as it offers a unique differentiator in skin assessment within our product offering. It delivers outstanding mole imagery generated from up to 2 mm below the skin to deliver 5 images – a significant advantage in assessing the risk associated with a mole or lesion.”

“Paul and his team are excellent business partners who have developed an outstanding system for assessing risk in a number of health fields. We are delighted to be able to be part of such an innovative approach to healthcare.” said Rob von der Porten, MedX CEO.

About MedX

MedX, headquartered in Mississauga, Ontario, is a leading medical device company focused on skin cancer with its SIAscopy technology. This technology is imbedded in its products SIAMETRICS™, SIMSYS™, and MoleMate™, which MedX manufactures in its ISO 13485 certified facility. SIAMETRICS™, SIMSYS™, and MoleMate™ include hand-held devices that use patented technology utilizing light and its remittance to view up to 2 mm beneath suspicious moles and lesions in a pain free, non-invasive manner, with its software then creating real-time images for physicians and dermatologists to evaluate all types of moles or lesions within seconds. The devices are sold to physicians and clinics, as well as being deployed in pharmacies and remote clinics from where the images are sent to dermatologists who perform a diagnosis. These products are Health Canada, FDA (US), ARTG and CE approved for use in Canada, the

US, Australia, the European Union and Turkey. SIAMETRICS™ is a unique product used in a specialized market for research into the clinical effectiveness of medical treatments of certain skin conditions. MedX also designs, manufactures and distributes quality laser and light therapy technologies for use in numerous medical settings, approved in major jurisdictions, to provide drug free and non-invasive treatment of tissue damage and pain. About Nationale Healthcheck BV

Nationale Healthcheck is a Netherlands-based company founded by a group of successful entrepreneurs, with the mission to improve the deliverability of preventative healthcare in the Netherlands. The company has developed a specially designed National Healthcheck mobile case containing multiple medical tests, including heart and blood vessels, lungs, stress, blood pressure, saturation, biometrics, cholesterol, glucose and skin assessment using MedX's SIAscopy. Testing can be completed during visits to companies' offices, senior's centres and sports clubs, or at locations visited by a specially outfitted Healthcheck bus. All tests are assessed by a doctor, including a dermatologist for the assessment of SIAscopy scans, with a full report prepared and sent to the patient. Healthcheck has collaborated with Dutch Health Insurers which provide full reimbursement of all the tests conducted by Nationale Healthcheck.
